PLUSH Single Pad Headrest Systems utilize dual density foam layers on a contoured, curved panel. These single pad headrests are easily adjustable and accommodate changes or inconsistencies in body positioning. Unique “cupping” shape provides posterior support with a high degree of comfort and safety. This basic headrest is ideal for tilt/recline, and has the ability to add lateral support, anterior support, or switches as client’s needs change. The larger size pads facilitate safety for clients with behavioral issues and active movements.

Specialty PLUSH Single Pad Headrest Systems are formerly custom solutions that are now offered as part of the standard product line including Adjust-A-PLUSH (shown below), Dual Mount and 12" Narrow pads.

SPECIALTY PLUSH

ADJUST-A-PLUSH

Designed for use on clients that exhibit poor head control and require lateral support on at least one side to maintain an upright head posture. Assists in controlling passive and active lateral cervical flexion. Suitable for clients with poor targeting that require some degree of lateral confinement in their headrest. The Adjust-A-PLUSH has two tapered locking joints that can be narrowed or widened to provide maximum lateral support. Zippered cover hides adjustment points.

DUAL MOUNT PLUSH

An extra mount provides added strength making this head support ideal for high tone, high extension clients. The pad is offered in 19" and 14" widths.

NARROW PLUSH

Offers low profile support in a 12" width.

Contoured Cradle Head Support's positioning success is derived from its unique anatomic shape. Generically designed to cradle the occiput and provide lateral cervical support, this unit supplies a high degree of comfort and positioning in a simple-to-adjust head support. A single rotational collar adjustment allows positioning for maximum support surface contact. Four pad sizes fit infant to adult. Add lateral facial pads, switches, and/or anterior support for more versatility.

S.O.F.T. Single Sub-occipital Head Supports supply sub-occipital and proximal lateral cervical support via a single curved sub-occipital pad. Unique to our single sub-occipital system is the independent anterior/posterior occipital pad movement. Consistent, repeatable positioning of the client is required for best performance. The addition of lateral facial pads, switches, and anterior supports increase this system's versatility.

S.O.F.T. Three Pad Head Supports solve the most challenging head positioning issues. This patented device combines two width and rotationally adjustable sub-occipital pads with an adjustable occipital pad for independent anterior/posterior movement. The added adjustability of the individual suboccipital pads allows adjustment to asymmetrical postures and deformities. This unique pad configuration supplies maximum occipital and proximal lateral cervical support for more aggressive positioning and comfort. Consistent, repeatable positioning of the client is required for best performance. Attaching lateral facial pads, switches, and/or anterior supports adds to this system's versatility.

The Heads Up is an innovative head support designed to maximize clients' interaction with their environment by providing anterior, posterior and lateral support of the head and neck. It features swing-out, adjustable arms to easily accommodate client transfers and varying client presentations.

HEADS UP

ANTERIOR AND LATERAL STABILIZATION OF SHOULDERS AND TRUNK FOR OPTIMAL HEAD CONTROL

- Innovative anterior stabilization arms
- Swing-out for easy transfer that maintains head support
- Lower lateral adjustments to accommodate varying body shapes

TWO DIFFERENT INDUSTRY-PROVEN POSTERIOR SUPPORT OPTIONS:

- Contoured Cradle
- Single Sub-Occipital

Lateral Facial Pads can be configured to accommodate or block lateral flexion deviations and/or rotation patterns or function to supply general support surfaces or switch placement above the cervical level. A rearward mounting hardware pivot point allows the pads to move out-of-the-way during transfers or when not in use. Curved ball rods allow placement of pads around the head laterally or anteriorly. A choice of 7 uniquely shaped pad sizes, 5 of which are malleable; ensure the ability to match the pad with the area needing support.

LATERAL FACIAL SUPPORTS

Part numbers for the pads and hardware are listed below.
Hardware is swing-away and must be ordered with the pad part number.

Anterior Supports are excellent for low tone individuals with poor head balance, individuals exhibiting forward flexion patterns, or individuals who require an upright head position for medical reasons, i.e. compromised respiration and swallowing. Successfully used for task oriented applications, such as classroom interaction or during meals. The addition of a Strap Cap brings a low profile solution to anterior support for individuals who may not be successful with the strap.

MOUNTING HARDWARE OPTIONS

Each head support pad is available with most of the hardware options listed below. Part numbers for order can be found on the detailed head support product pages.

AXYS is a compact mounting system that features a black chrome finish combined with a ½" steel square rod. It was designed for rigorous applications, ease of adjustment, and simple modifications.

Height: 12"
Horizontal Depth: 6"
Pitch Adjustment: 30°

LINX is a contemporary styled mounting hardware that combines two simple, unique points of adjustment which allows full anterior/posterior fluid movement, creating an infinite range of support surface placement. It features satin black tubing with contrasting polished aluminum clamps and knurled mounting ball ensures stay-in-place adjustments.

Height adjustment: 7"
Horizontal Depth: 8.5" forward, ¾" rearward
Pitch Adjustment: 30°

The COBRA XTRA Mounting System incorporates a sleek and unobtrusive design that eliminates protrusions towards the rear of the chair. With superior strength and positioning range, the COBRA XTRA Mounting System is available in Small (Early Intervention and Paediatric), Medium (Paediatric), and Large (Adult). The components are modular and easily changed in the field to enable exact positioning of the head support pad – even if the user's head position changes from the time of the initial prescription.

Adult
Height adjustment: 6.5"
Horizontal Depth Adj: 6.5" forward, 2" rearward
Pitch Adjustment: 30°

Paediatric
Height adjustment: 3.5"
Horizontal Depth Adj: 5" forward, 1.5" rearward
Pitch Adjustment: 30°

Early Intervention
Height adjustment: 3.5"
Horizontal Depth Adj: 4" forward, 1/2" rearward
Pitch Adjustment: 30°

ONYX is a compact mounting solution that features a black chrome finish combined with a small profile 7/8" steel rod. It was designed for rigorous applications, ease of adjustment, and simple modifications.

Paediatric
Height adjustment: 8"
Horizontal Depth Adj: 1" to 6"
Pitch Adjustment: 30°

Adult
Height adjustment: 11"
Horizontal Depth Adj: 1" to 8"
Pitch Adjustment: 30°

The PRO Mounting System is a proven hardware option for demanding applications. This mounting system features 1.25" aluminum extrusion and is ideal for use when client strength or strong tonal patterns are an issue.

Paediatric
Height adjustment: 6"
Horizontal Depth Adj: 1.5" forward, 6" rearward
Pitch Adjustment: 45°

Adult
Height adjustment: 6"
Horizontal Depth Adj: 1.5" forward, 8" rearward
Pitch Adjustment: 45°

COBRA XTRA Flip Back

The COBRA XTRA Flip Back Mounting System is operated by a single push-button on the side of the bracket and neatly flips the assembly back behind the wheelchair back. With superior strength and positioning range, the COBRA XTRA Flip Back Mounting System is available in Small (Early Intervention and Paediatric), Medium (Paediatric), and Large (Adult). The components are modular and easily changed in the field to enable exact positioning of the head support pad – even if the user's head position changes from the time of the initial prescription.

Adult
Height adjustment: 6.5"
Horizontal Depth Adj: 6.5" forward, 2" rearward
Pitch Adjustment: 30°

Paediatric
Height adjustment: 3.5"
Horizontal Depth Adj: 5" forward, 1.5" rearward
Pitch Adjustment: 30°

Early Intervention
Height adjustment: 3.5"
Horizontal Depth Adj: 4" forward, 1/2" rearward
Pitch Adjustment: 30°

CUSTOM MOUNTING OPTIONS

FLEX INTERFACE BRACKET

The Flex Interface Bracket provides upward flex, travel, and return when the head support is extended against. This dynamic motion assists in maintaining head support contact throughout the user's extensor pattern. The Flex Interface Bracket utilizes elastomeric bushings engineered to supply the correct resistance-to-force while allowing the head support to return to the adjusted position. Used between the head support mount and contact surface, the Flex Interface Bracket can be used with most Whitmyer head support accessories.

Part Number: M9450

UNIVERSAL SWING-AWAY MOUNT

Whitmyer detach brackets attach to our universal swing-away mount. When attached to the swing-away mount, the assembly becomes a combination detach/swing-away mounting bracket.

Part Number: M5000

SLIDE MOUNT

This slotted plastic plate allows the headrest/head support to be positioned in a more perpendicular fashion behind the head of individuals who present with a significant amount of asymmetry. The plate bolts into the chair's existing hole pattern and allows 4" of movement left or right. Perfect for trying off-set head support locations, adjusting for misplaced T-nut locations and relocating the head support to be more in line with the direction of applied forces.

Part Number: M7010

PRO OFF-SET MOUNTING SYSTEM

PRO system off-set bracket provides 2-1/2" of rearward adjustment to the horizontal bar. Flipping the horizontal bar will also allow for 2-1/2" of forward adjustment.

Part Number: PRC7070

ONYX REARWARD OFF-SET VERTICAL ROD

ONYX off-set vertical rod provides 2-1/2" of rearward/forward adjustment to the horizontal rod.

Part Number: OX6030

Whitmyer Head Supports can be ordered with any Quickie®, Zippie® or Breezy® mobility product base and as a great addition to a JAY® standard or custom seating solution. Order them together to ensure compatibility prior to shipment and save time and money with ONE ORDER and ONE INVOICE.
